

Session Description Protocol draft-ietf-mmusic-sdp-new-04.txt

Colin Perkins

USC Information Sciences Institute

Status

- Update to SDP “classic” to fix bugs, prior to advancing to draft standard RFC
 - Trying to avoid adding new features
 - See SDPng for that...
- One revision since last meeting
- Any more changes?

Protocol changes in -04

- Add a=inactive attribute
- Note that s=- SHOULD be used for sessions with no meaningful name.

Clarifications in -04

- Updated BNF from Jonathan Lennox
 - Please check this!
- Clarify that a=rtpmap is a media attribute.
- Clarify that b=AS field is the RTP session bandwidth
- Note about a=maxptime:
 - “Note that this attribute is introduced after RFC 2327, and non updated implementations will ignore this attribute”

Editorial changes in -04

- Add Changes since RFC2327 section
- Add c≡ example for IPv6

Future work?

- Ready for last call?
- Interoperability testing...
 - Volunteers?
